Hi Wenona,

Shirley asked me via to give her a hand with Revision #2 and forwarded your email to me with attachment. I haven't been able to reach Shirley by phone and also left a voice mail message for you as I'm confused about the Estimated Component Work Years.

I need to make sure that I'm working off the current work plan and budget for Revision #1 and why I'm forwarding to you what I sent to Shirley to look over and make any changes she felt were necessary before sending to you.

I've also included the spreadsheet for Component Cost and Estimated Work Years. Again, I'm confused by how to make this work as in the past we were always told the estimated work years for all components need to equal 100 percent.

I'll try calling in a bit though getting close to the end of the work day for you. If we're not able to touch bases today, are you available tomorrow?

Sue

Subject: IGAP revisions

Shirley,

I added the component cost and estimated work years to all three components and new commitment to component 3 (SW) to address the sustainability issue in Wenon's revision request. Also made minor editing changes to the work plan. Regarding budget, I adjusted the heating/electric/maintenance to reflect the amounts you gave me and added registration fee for Region 10 Conference (Tribal Leaders Summit). Reduced the Levelock-Anc (RT) fares somewhat (still higher than what Denina Air charges right now) to make the budget add up to \$115,000.

I'm attaching the following documents:

1. Revised work plan with all changes highlighted in bold
2. Revised work plan with no bold text
3. Revised budget

Here's what I recommend you do. Email the documents (both work plans and budget) to Wenona and tell her that the work plan with changes highlighted in bold is so that she can see the changes made based on the revision request.

You'll need to spend time reviewing the changes in the work plan and budget in case she still has questions or needs additional clarification. I'm available to participate in a conference call with you and Wenona to help explain the changes if needs be.

Later,
